

Statement on California Proposition 65

California Proposition 65, the California Safe Drinking Water and Toxic Enforcement Act of 1986, is intended to protect drinking water sources from chemicals known to cause cancer, birth defects or other reproductive harm, and to inform citizens about possible exposures to such chemicals.

Calex has reviewed and considered the substance list of the California Proposition 65 regulation. Having reevaluated supplier certifications and material composition declarations, Calex has determined, to the best of its knowledge and belief, that:

- Calex products may contain one or more of the substances registered on this substance list. Information regarding substances contained may be found in Calex product composition declarations.
- Calex products are not intended to cause consumer exposure to any contained substances during normal product use.

The above statements are valid and accurate to the best of our knowledge for products in original condition as shipped from our factories, including but not limited to the referenced product composition declarations.

Authorized signatory for Calex Mfg. Co., Inc.:

A handwritten signature in black ink, appearing to read "Jay vanWormer". The signature is written in a cursive style and is positioned above the printed name and title.
