PRODUCT OVERVIEW
The HBR series of isolated regulated converter modules, deliver an impressive 250W single output from an ultra-wide 10:1 input voltage range, complying with the 24V to 110V input battery voltages including transient as per EN50155 (2017) standard. The industry standard half brick package offers high efficiency levels of up to 90%. The fully isolated (3000Vrms) DC-DC module accepts a wide input voltage range of 16V – 160VDC, while maintaining a fully regulated single output. The output voltage features Overvoltage, Overcurrent, short circuit, Overtemperature and Vout overshoot protection. Other features include – adjustable Undervoltage lockout, adjustable Current limit threshold, Positive or Negative Logic enable and a Hold Up Pin to allow connection of an external capacitor.
